“Lipetsky khladokombinat”, OJSC

About company

OJSC “Lipetsky khladokombinat” is a facility in Lipetsk that produces ice cream. OJSC “Lipetsky khladokombinat” has a leading position in the Central Black Earth Region. Its products are widely distributed in more than 40 regions of Russia and beyond.

JOJSC “Lipetsky khladokombinat” is one of the three largest exporters of food products in the Lipetsk region.

At the OJSC “Lipetsky khladokombinat” everything is being done to make Lipetsk ice cream an example of quality and taste, not only in the domestic market, but also in the world. OJSC “Lipetsky khladokombinat” was the first in the country to switch to modern and safe compressors with a level of protection that prevents leakages into the atmosphere. The technical re-equipment of the boiler house and the reconstruction of the refrigeration unit in the compressor workshop completed the process of creating an enterprise that meets high technical specifications. The company has 10 ice cream production lines that allow producing up to 85 tons of ice cream per day.

Products

Over 80 types of ice cream. Chocolate popsicle with various flavors and toppings, popsicle in juice glaze, “Fruit ice” dessert, ice cream in waffle cups and briquette on waffles, in sugar cones, baths, ice cream rolls and other types of large-sized ice cream.

“LIPETSKPIVO”, LLC

About company

The brewery with a capacity of 4 million dal. per year was built in accordance with the project of the «State Design Institute Rosgipropishcheprom» and put in commission on the 30th of September 1977.

Large-scale modernization of all the shops and equipment in concordance with the latest standards of brewing and nonalcoholic beverages production started at the factory in 2005. Modern high-technology equipment was installed. All the stages of production in concordance with the world standards of quality were worked out in details in co-operation with the experienced foreign technologists.

The present equipment and technologies make it possible for us to carry out the output of products on a high microbiological level without adding of preservatives, stabilizers and other substances extending shelf life of beer and beverages.

Today the brewery is a completely automated modern enterprise with production facilities: Beer – 15 million dal. per year. Nonalcoholic beverages – 25 million dal. per year.

Products

Beer, Kvass, Water, «Limonadiya» - low-calorie strongly sparkling nonalcoholic beverages, no preservatives added.,

«MINIJUICE» - nonalcoholic strongly sparkling fruit juice drinks of cold process bottling, pasteurized, aromatized, «Fruit land» - nonalcoholic noncarbonated pasteurized fruit juice drinks of cold process bottling, aromatized, «Sweet land» - nonalcoholic strongly sparkling pasteurized beverages of cold process bottling, no preservatives added, aromatized.

“New century Agrotehnology”, CJSC

About company

Our company was founded at 1998.

We were the first importer of NetBags for packing vegetable and potato from China to Russia. And now we are the biggest direct supplier of NetBags in our country.

At 2011 we built in Russia Drip tube factory, for irrigation systems.

Now New century Agrotehnology is the biggest manufacturer of drip irrigation system in Russia. We supply all necessary equipment for any size projects of drip irrigation systems: drip tubes, filters, fittings, mainlines, fertigation kits, control valves etc.

Exports are carried out to countries such as Kazakhstan, Belarus, Uzbekistan, Armenia and other CIS countries.

The company has a wide network of branches throughout the country.

Products

Drip irrigation systems under the brand name NEO-DRIP

Packaging materials for vegetable and fodder crops under the brand «Tien-Zhen»

“Gidroprivod”, OJSC

About company

“Gidroprivod” OJSC is a modern enterprise, founded in 1940, specializing in the production of hydraulic equipment for various industries.

We satisfy the needs of such enterprises as LLC “KZ” Rostselmash”, PJSC “KAMAZ”, PJSC “Avtodiesel” (YaMZ), PJSC “NEFAZ”, JSC “AZ “URAL”, OJSC “Arzamassky plant of municipal engineering”, LLC “Plant of complex road cars”, Smolensk.

Products

“Gidroprivod” OJSC produces:

- adjustable and unregulated vane pumps, hydrostations and pumping units for metal-cutting machines, forging and other equipment;
- hydrodistributors for road-building equipment, public utilities, agricultural machinery;
- power steering pumps for KAMAZ, MAZ, URAL vehicles;
- control valves for tipping mechanisms of dump trucks with and without a trailer;
- pumps and units for pumping liquefied gases;
- drain filters, valves, flow regulators and other equipment.

“Lipetsk machine tool plant”, LLC

About company

The company «Lipetsk machine tool plant» is a constant participant of international exhibitions of the machine-building products, both in Russia and abroad. The products presented at the exhibitions are constantly marked with diplomas. Employees of the team undergo continuous and advanced training in the field of management, sales organization, production organization, in the development of new technologies and design solutions.

At the moment, the company «Lipetsk machine tool plant»:

- is a member of Rosstankoinstrument, which unites more than 200 manufacturers of Russian machine tools;
- is a member of the Lipetsk regional Association of industrial enterprises;
- Included in the top three with products provided in 2018 according to Rosstankoinstrument;
- Included in the list of systemic companies in Russia;
- is an anchoring company of the machine-tool cluster organized in Lipetsk region with support of the Ministry of Industry and Trade of Russia;
- is recognized and one of the main manufacturers and suppliers of grinding, milling and drilling equipment, stands for testing of abrasive wheels, magnetic accessories.

Products

METAL-WORKING EQUIPMENT: grinding, milling and drilling equipment, stands for testing of abrasive wheels, magnetic accessories.

“PK RAZIONAL”, LLC

About company

RAZIONAL company is a manufacturer of the unique heating equipment developed by RAZIONAL company and patented in all major countries of the world: RAZ heating stations, heating systems RAZ 2-150, heating Units R 1-11, district heating stations ML 1-60.

RAZIONAL production enable engineering and construction companies to create and build boiler plants in the output range from 200 kW to 15 MW and district heating stations in the output range from 100 kW to 6 MW on the principle of modularity in a very short period.

RAZIONAL products are a new efficient technical solution in heat and power industry. For over 25 years the company has been producing and distributing the heating equipment. The production facility's location is in Lipetsk Industrial Special Economic Zone. The investments in its own production and proprietary products amounted to 50,2 million euros.

Products

1. RAZ heating stations – prepared heating solutions, output 200 kW to 18 MW;
2. RAZ 2-150. Heating systems – prepared solutions for heating stations, output 200 kW to 15 MW;
3. R 1-11. Heating Units – series elements for ready-to-operate heating stations:
4. ML 1-60. District heating stations – prepared heating solutions for buildings, output 100 kW to 6 MW, including following fully prepared Units.

“Shatalov”, LLC

About company

LLC Shatalov was founded in 1998 to satisfy the growing demand for construction materials by manufacturing corrugated metal roofing and drainage systems. Today, we produce roll forming equipment for virtually any type of roll formed product. LLC Shatalov comprises three factories based in Lipetsk, which encompass more than 50 000 square meters and employ 170 staff in total. We strive for continuous improvement in metal bending technology. Our engineering team utilize the latest design tools to develop the equipment that goes beyond current roll forming standards. We hold thirty-two patents in roll forming machinery, twenty of which were received by the founder of the company, Dr. Gennady Shatalov.

On-time delivery and a comprehensive approach to maintaining top machine performance are hallmarks of our company and its customer service. As we are aimed at long-term cooperation with our clients, we stand firmly behind our roll forming products. Our after service and sales support team is always ready to help if you require any assistance. The company's competitive advantage lies in responding to the modern demands of the market and satisfying the fast changing needs of our customers all over Russia and abroad in order to help you stay on the leading edge. We guarantee a positive buyer experience and excellent business partner relationships which are open, honest, and respectful.

Products

Roll forming machine for the production of metal tiles, profiled sheet, siding, machine for longitudinal and transverse cutting of metal, for the production of wall and ceiling profiles, plasterboard, equipment for the production of reinforcing PVC profiles, for the production of drainage systems. We produce ACS for roll forming equipment.

“TEXHA”, LLC

About company

TEXHA plant is the most modern fleet of machines and systems for the production of innovative highly technical equipment for the poultry industry. Quality management system has been implemented by the company in accordance with ISO 9001: 2015 international standards.

Our main competitive advantage is a consistently high quality of product and unique services. Installation of equipment, supervision of assembly and commissioning of facilities, full warranty and post-warranty service, comprehensive technological support of production of the customer are the integral parts of the company's business

Products

As well as high quality poultry equipment, TEXHA offers customers integrated solutions for the automation of all systems and services necessary for poultry breeding and maintenance: cage and floor equipment, cage equipment for layered housing, cage equipment for housing breeders cage equipment for breeding junior pullets and broilers. The company offers alternative 'Baltica' system for laying hens, in line with European standards – this system offers farms a larger pasture space, resulting in optimized conditions for the birds. This leads to birds having a better mental well-being and therefore higher quality produce.

“Energiya”

About company

AO Energiya holds the leading position in production and customized development of chemical sources of current for space and rocket-artillery ordnance, aviation, naval and civilian sea and river fleets, emergency communications and fire extinguishing systems. From 2007 we have set up serial production of energy storage units based on the electrochemical capacitors and characterized by high specific parameters, long service life. They have come into common use both for civilian purposes – hybrid vehicles, railway vehicles, sufficient energy systems, and for Ministry of Defence needs.

We have set up production of lithium-ion rechargeable batteries with different dimension types.

As part of the import substitution program, we have set up production of primary power sources:

FR6 (AA) of lithium iron disulfide electro-chemical system, FR03 (AAA) of lithium iron disulfide electro-chemical system CR34615 (D) of lithium manganese dioxide system. They remain functional within wide temperature range (from minus 40 to plus 60°C) and are characterized by high capacity, high discharging currents, low self-discharge and long storage period – up to 10 years. Another upcoming direction of AO Energiya is development of power sources for UAV, high-power sources of current for energy storage units for electric automobiles.

Products

Lithium-ion cells and batteries; lithium cells and batteries; electrochemical capacitor modules (supercapacitors); nickel-cadmium batteries; mercury-zinc cells and batteries; thermal batteries.

“FORSAGE OIL”, LLC

About company

FORSAGE OIL LLC is Russian producer of oils and industrial liquids of different types and designations.

Main advantages of Forsage oil: high quality, optimum price, technical and testing possibilities, logistic possibilities, 18-years experience of oil and fuel supply to largest Russian companies and to foreign clients from 15 countries.

The company was founded in 2001 as fuel and lubricants supplier to the largest enterprises of Lipetsk region. During a very short period Forsage became an official distributor of largest oil&gas companies such as Slafneft, TNK, Total, Rosneft, Shell, Castrol as well as oil producers Valvoline, Molykote, Mol.

In 2016 Forsage launched its own production of oils basing on Rosneft and Lukoil base products. Same year Forsage fulfilled first international contract and won tender for oil supply to space port Vostochny. All supplies were made in proper time, quality and quantity!

Today Forsage has 80 employees and branches in Voronezh and Orel. New factory is to start production in summer of 2020. It helps to considerably widen up range of oils and volume of export supplies.

Products

Motor oils, transmission oils, industrial oils, grease, coolant liquids, technical liquids.

“AVIKS GROUP”, LLC

About company

The company "AVIKS GROUP" is a manufacturer of greases and cutting fluids. The company has its own production facilities and a production license. All products are certified.

To control the quality of manufactured products and obtained raw materials, the testing laboratory "AVIKS GROUP" was certified. The company has a quality management system ISO 9001-2015. The scientific staff of the enterprise allows the production of environmentally friendly coolants and emulsols, as well as lubricants that are not inferior in quality to European manufacturers (FUCHS, SHELL, MOBIL, ROLF, etc.).

The result of this work was the development of new materials: AVIKS STEEL GUARD preservation oil, AVIKS COLD ROLL-3 emulsol for cold rolling steel, the AVIKS ALTA complex grease line, including calcium sulfonate greases (analogues of Total Ceran HV, HVA, WR2), greases "AVIKS Lithium EP 00,0,1,2,3, oil separator" AVIKS Molding Oil ".

Products

Greases based on lithium, calcium, lithium complex, calcium sulfonate thickeners, for the metallurgical and mining industries, mechanical engineering, railway transport, agricultural machinery, and heavy-duty equipment. Emulsols and process oils for steel rolling, casting, metalworking, pipe industry.

"PRESTORUS", LLC

About company

The company "PRESTORUS" has been engaged in geosynthetics since 1998 and today is a multidisciplinary company with significant experience in the development, production and practical application of modern geosynthetics. Today the PRESTORUS supplies products to international markets, and has a dealer network in Russia and abroad.

The main emphasis in business development is placed on innovative products that have no analogues in the world. Among our innovative developments, the GEOKORD® reinforced geogrid and the voluminous geogrid to strengthen the GEOSTEP® slopes. The PRESTORUS has more than 35 patents for inventions and utility models, 4 of them are jointly owned by PJSC Gazprom.

Since 2017, the production unit of the company has been located in the Lipetsk Special Economic Zone on an area of 5.7 hectares, the head office is in Moscow. The PRESTORUS company has a full-cycle production, equipped with modern equipment from leading European brands (Herrmann, Krauss Maffei, Instron, etc.). The capacity of the equipment allows the production of more than 10 million m² of geosynthetics per year. The PRESTORUS has its own quality laboratory for regular inspection of manufactured products. We are constantly striving to improve our products in order to increase their customer value for our customers and increase our competitiveness in the market.

Our main advantage is a close-knit team of professionals able to achieve their goals!

Products

Weld-free geocell GEOSTEP®, reinforced geocell GEOCORD®, three-dimensional Standard Geocell, flexible concrete slabs GEOSOTY®, geomembrane, non-woven geotextile GEOKNIT®-N, fastening key FAST-LOCK®, plastic anchor PRUTTEKS®, composite anchor GEOFORCE®, polymer nozzle ARM-clip®

“Electroma”, LLC

About company

LLC Electroma (trademarks - Electroma, LIKK) is a Russian manufacturer of self-adhesive materials, represented in the market for more than 22 years. Among the regular customers are more than 1200 companies from Russia, Kazakhstan and Belarus.

Our products successfully replace similar ones imported from Europe, USA and China. We produce more than 60 types of materials (including patented) for mechanical engineering (automotive, instrument-making, electronics). Manufacture of furniture, home appliances and clothes, installation of air conditioners and ventilation are impossible without self-adhesive materials. A special place is occupied by the production of industrial labels. Materials with special properties for operation in conditions of sharp temperature difference are developed.

The company has a well-equipped laboratory for quality control in accordance with the leading international standards. The main value of the company is its employees. Many of them are world-class experts.

Archaeological park “Argamach”, LLC

About company

Archaeological park “Argamach” LLC is engaged in research and development in the field of social sciences and humanities. The most important area of work of the Archaeological park is the popularization of archeology, which is carried out through the construction of a reconstruction park, the creation of museum expositions, the organization and holding of scientific conferences, the production of scientific collections, and the holding of festivals.

The Argamach Archaeological park is located in a picturesque place on the high bank of the Palna River, not far from the specially protected natural area (SPNT) of Argamach-Palna. The infrastructure of the park is actively developing. Guests can stay in a log two-story hotel with comfortable rooms, built according to old technology without nails, rent houses of various degrees of comfort or choose accommodation in Buryat yurts. For the convenience of visitors, the park provides parking areas, a cafe, a bathhouse, a souvenir shop and laundry facilities.

The park pays special attention to the issue of education, upbringing, socialization and improvement of children and adolescents. Excursions, master classes in traditional crafts, interactive programs, tent camps are held for them.

The State dance theater "Cossacks of Russia"

About company

The State dance theater "Cossacks of Russia" is one of the leading professional dance groups in the country.

The theater was founded in Lipetsk in 1990 by Leonid Petrovich Milovanov, People's Artist of the Russian Federation, laureate of the Central Federal District Prize, laureate of the Government Prize in the field of culture for 2014. It consists of more than 60 artists of various genres. The basis of the collective is a ballet troupe. A vocal group can rightly be considered an ornament of a dance theater, and a chamber orchestra performs musical works in traditionally folk and modern arrangements.

The program of the dance theater can be called an encyclopedia of Cossack life, expressed in spectacular stage form, in elegant colorful costumes, perky songs and unstoppable dances, representing the traditions and heritage of the many "Cossack" regions of Russia - from the Don River and the Black Sea to Siberia and the Far East.

After successful performances of the dance theater in 30 countries, such as the USA, Great Britain, Germany, Greece, Denmark, Spain, Italy, Canada, China, North Korea, Oman, Portugal, France, Sweden, Norway, Switzerland, Poland, Romania, we can talk about its unconditional recognition at the world level.

The estate "Skornyakovo-Arkhangelskoye"

About company

The estate "Skornyakovo-Arkhangelskoye" is one of the business cards of the Zadonsky district of the Lipetsk region. Its story has been going on for over three hundred years.

Centuries ago, this place was a thriving "noble nest", living its quiet, measured life.

Over the centuries, the Skornyakovo-Arkhangelskoye estate has friendly hosted a variety of guests: prominent noblemen and county landowners, governors and merchants, doctors and governesses.

Now the manor complex is fully restored and serves as a hotel and entertainment complex. Modern cultural life reigns here: interesting events and business meetings are held, and the opening of a museum is planned soon.

Products

The hotel complex "Skornyakovo-Arkhangelskoye" is engaged in the provision of accommodation, catering, rental services of premises for events of various sizes and various topics. "Skornyakovo-Arkhangelskoye" also offers additional services: entertainment for children in the form of visiting the children's town, attractions, visiting the zoo, boating along the pond, sightseeing services, and the estate also acts as a venue for festivals and photo shoots.
